## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-25, and 28 are drawn to an apparatus and method for measuring effective capacitance of a biosensor , classified in class 324, subclass 658.
  - II. Claims 26-27, drawn to glucose measurement method for use with a biosensor, classified in class 204, subclass 406.
  
2. Inventions of Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case claims 1, 9 and 20 require filtering the demodulated signal to produce a signal proportional to the effective capacitance across the biosensor cell which is different from that of claims 26 and 27 because the process as claimed can be practiced by another and materially different apparatus such as a photo illumination system to provide a glucose measurement based on the volume of the sample.

Art Unit: 2858

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that a reply to this requirement to be complete must include the election of the invention to be examined even though the requirement be traversed (37 CRR 1.143).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter Benson whose telephone number is (703) 306-4525 or (571) 272-2227 after 1/27/04. The examiner can normally be reached on Mon to Fri 6:30 AM to 4:00 PM.
